PROBLEM – SOLUTION FIT

1.CUSTOMER SEGMENT(S)	6.CUSTOMER LIMITATIONS	5.AVAILABLE SOLUTION
With the absence of child monitoring system, it is hard to monitor the where about the child. Poor performance of the school to monitor the child by collaboration's.	Lack of child monitoring in school affects the child's behavior. Children are prone to many accidents.	Development process of the system is unique. Real life implementation and development consideration.
2. PROBLEM / PAINS A panic alert system should be implemented in the wearable device. And need the real time information of the child abduction.	**9.PROBLEM ROOT / CAUSE** In today's developing world child safety is a rising problem. Since children cannot protect themselves, they are mostly involved in abductions.	**7.BEHAVIOR** Frustration, Emotional instability, stress reactions, anxiety, trauma and other psychological symptoms are observed commonly after child abduction and other traumatic experiences.
3. TRIGGERS TO ACT These risks can combine with each other to complex events, the analysis of which requires a systematic approach that takes into account not only the systems involved and their independencies, but also the combination of events and the various propagation processes that occur in such systems. **4. EMOTIONS** Before / After Before there was Insecurity for child and inability of protecting the child and now there is safety for the child and they can be detected at any time as there are into the geofence around them.	**10.YOUR SOLUTION** 1. Awareness among the consumers 2.Education about the system implementation 3.Updation of the system 4.Prediction	**8.CHANNNELS OF BEHAVIOR** Online Twitter is indeed a social sensor with different sensitivity levels to detect the childs safety and depending on the event circumstances, a diverse pattern of social media behavior should be expected. Offline Awareness in society about child safety and their protection and event circumstances of media behavior should be expected.
